

Potential Title: Front End Developer

Reports to: VP Product Management / CTO

Company Profile: Optigo Networks is shaping the future of the commercial Internet of Things (IoT) by redefining how smart buildings are connected. Optigo Networks reduces the cost and complexity of deploying IoT by providing a robust edge to cloud solution for connecting and monitoring the systems that make buildings secure, comfortable and efficient.

Optigo Networks' products consist of Connect™ a network platform that can be used to connect and manage IP devices, and Visual BACnet™ / InSight™, cloud-based monitoring solutions that leverage machine learning to enhance the integrity of building systems. Optigo is working with the largest building solutions providers in the world to bring new and innovative solutions to market.

The Role: Optigo is entering a new growth phase as we build the team that will deliver our next generation of products. We are seeking a full-time **Front End Developer** to join the talented team that was recognized as the 2015 Most Promising Startup in BC and in 2017 continues to shake up the industry. In this engaging position, you will be responsible for building the web front-ends for Optigo's next generation products.

Help us make an impact on the rapidly evolving world of smart buildings. Learn more at www.optigo.net.

Key Duties and Responsibilities:

- Build top notch front-end user interfaces for Optigo edge and cloud products
- Translate a rich feature-set on the back-end into simple to use user interfaces

Skills and Qualifications:

- 3-5 years of experience in creating interactive and scalable front-end web applications (SaaS/mobile)
- You have a keen eye for design and ability to create beautiful user interfaces
- Degree in computer science, computer engineering or related discipline
- Mastery of HTML5, CSS3, and JavaScript
- Comfortable with UX/UI design concepts for building responsive web applications
- Experience with Meteor, AngularJS or related technologies
- Comfortable working in a Linux environment
- Adept at working in an Agile Development Environment with tools such as JIRA
- Capable of ramping up quickly and a willingness to learn in a startup environment
- Team player with strong communication skills, positive attitude and strong work ethic.
- Committed to the continuous development of your technical expertise

Additional Desired Skills:

- Skilled in data visualization
- Experience with AWS services and distributed applications
- Passion for new technologies and a desire to take ownership
- Experience building video games or other user interfaces

Benefits: Optigo Networks provides a competitive compensation package that includes stock options, benefits, educational opportunities, and the ability to work with the latest technologies in a fun, agile, startup work environment.
